

DANG NGUYEN GIA BAO

Fullstack Developer

0908109691 | baodngworkstation@gmail.com | linkedin.com/in/baodngworkstation | github.com/Baodng2402

SUMMARY

Fullstack developer with a strong focus on Frontend development, building responsive web and cross-platform mobile applications. Experienced in designing scalable RESTful APIs with Java Spring Boot and integrating robust backend services with modern, state-managed React/Next.js interfaces.

EXPERIENCE

MEBISOFT COMPANY

Fresher Fullstack Developer

Apr. 2026 – Present
Ho Chi Minh City, Viet Nam

- Architected scalable Fullstack solutions for customer platforms (Next.js, Java Spring Boot) and internal systems (NestJS).
- Engineered secure RESTful APIs to manage complex catalogs, order workflows, and RBAC with responsive frontends.
- Managed full-cycle deployments leveraging PostgreSQL, Docker, and GitLab CI/CD for stable production releases.

FPT SOFTWARE PHILIPPINES

Software Engineer Intern / Fresher – Fullstack & RPA Focus

Jan. 2025 – Nov. 2025
Philippines

- Engineered a ReactJS and Node.js dashboard to streamline HR travel requests and internal approval workflows.
- Built end-to-end automation pipelines using UiPath RPA bots to autonomously aggregate request data and attachments.
- Integrated SMTP notifications and maintained SQL databases to ensure robust audit tracking and system reliability.

PROJECTS

Banh Mi Nhu Y Web & CMS

May 2026 – Present

- Architected a scalable Fullstack platform with responsive ordering interfaces (Next.js) and robust backend services.
- Engineered secure APIs to process complex food orders, manage catalogs, and sync real-time CMS data, ensuring a frictionless UX.
- **Tech stack:** Next.js, Zustand, Tanstack Query, React Hook Form, Java Spring Boot, PostgreSQL, Docker, GitLab CI/CD

Mebisoft Internal System

Dec. 2025 – Apr. 2026

- Constructed Next.js dashboards and NestJS backend modules to streamline internal workflow tracking and data management.
- Optimized database operations and implemented secure role-based access control (RBAC) across all operational modules.
- **Tech stack:** Next.js, Zustand, Tanstack Query, React Hook Form, NestJS, PostgreSQL, Docker, GitLab CI/CD

360 Retail Mobile

Aug. 2025 – Nov. 2025

- Developed a cross-platform mobile POS (Point of Sale) application to streamline retail workflows, sales transactions, and store management.
- Implemented robust state management using Zustand and optimized mobile UI components to ensure seamless cross-platform performance.
- **Tech stack:** React Native, Zustand, Tailwind CSS, RESTful API

SKILLS

Frontend: Next.js, ReactJS, React Native, TypeScript, Tailwind CSS, Shadcn/UI, Redux Toolkit, Zustand, Form Validation

Backend: Java, Spring Boot, Node.js, NestJS, RESTful API, JWT Authentication

Database & DevOps: PostgreSQL, MySQL, MongoDB, Docker, Git, GitLab CI/CD, Postman

Architecture & Others: System Architecture, Database Design

EDUCATION

FPT University

Software Engineering

Aug. 2022 – Present
Ho Chi Minh City, Viet Nam

- GPA: 3.0 / 4.0
- English: Professional Working Proficiency (IELTS 6.5)
