SKILLS

Frontend Core & Framework:

- Languages:** JavaScript (ES6+), HTML5, CSS3, TypeScript (Basic).
- Frameworks:** ReactJS, Next.js (Basic).
- Mobile Development:** React Native, Flutter.
- Libraries & State Management:** Redux Toolkit, Zustand, Axios, Tailwind, Firebase, Bootstrap.

Backend & Database (Supporting):

- Runtime & Framework:** Node.js, Express.js.
- Java:** Java Object-Oriented Programming (OOP).
- Databases:** SQL (MySQL, SQL Server, PostgreSQL) | NoSQL (MongoDB).
- API:** RESTful API design & integration, JWT Authentication.

Tools & DevOps:

- Version Control:** Git, GitHub.
- CI/CD & Automation:** GitHub Actions (CI/CD), RPA (UiPath Studio).
- DevOps:** Docker.

Soft Skills:

- Workflow:** Agile/Scrum, SDLC practices.
- Personal:** Analytical thinking, Problem-solving, Effective communication.

Languages:

- English: IELTS 6.5, fluent in reading technical docs and verbal communication.
- Japanese: Basic communication.

CERTIFICATES

Certificates: Completed 10+ specialized programs on Coursera from top universities (Michigan, Minnesota, UC Irvine) covering Full-Stack Development, SDLC, Java Testing, UX Research, and Professional Project Management.

PROFILE

I am a final-year Software Engineering student at FPT University with a strong passion for Frontend and Cross-platform development. My experience includes building responsive web and mobile applications using ReactJS, React Native, and Flutter, with a focus on seamless RESTful API integration. I have a solid foundation in state management (Redux Toolkit, Zustand), databases (PostgreSQL, MongoDB), and international work experience through an internship at FPT Software Philippines. I am eager to apply my technical skills and IELTS 6.5 English proficiency to a dynamic Junior Fullstack Developer role.

WORK & EXPERIENCES

FPT SOFTWARE PHILIPPINES

1/2025 - 11/2025

SOFTWARE ENGINEER (Fullstack & RPA Focus)

Description: Developed a Business Process Automation system (HR Support) to streamline employee travel requests and HR approval workflows.

Responsibilities:

- Developed an RPA bot using UiPath to automate daily retrieval of business travel requests and document attachments (tickets, invitations).
- Built a web management interface using ReactJS and Node.js for HR to review, approve, or reject applications efficiently.
- Integrated automated email services via SMTP to instantly notify employees of application status updates.
- Applied system optimization with smart filtering logic to skip idle cycles and used SQL for data integrity and audit tracking.

PROJECTS

EV STATION-BASED RENTAL SYSTEM

9/2025 - 12/2025

Role: Fullstack Developer

Technologies: ReactJS, React Native, Node.js (Express), MongoDB, JWT, Axios, Redux Toolkit, Vercel.

Frontend & Mobile Development:

- Web Dashboard (ReactJS):** Developed a comprehensive management interface for admins to track vehicle status, manage rental stations, and process user bookings. Deployed using Vercel.
- Mobile Application (React Native):** Built a cross-platform mobile app for users to locate nearby EV stations, book vehicles in real-time, and manage personal profiles. Android APK deployment.
- State Management:** Optimized data flow using Redux Toolkit and Zustand to ensure synchronized state between the booking process and user history.
- Responsive UI:** Implemented clean, responsive designs with focus on UX, ensuring seamless performance across different screen sizes.

Backend & Database:

- RESTful API Design:** Developed a scalable backend using Node.js (Express) to handle complex logic for vehicle availability, pricing calculations, and rental timers.
- Security & Authentication:** Secured the system using JWT (JSON Web Token) for user session management and implemented middleware for role-based access control.
- Database Management:** Designed and optimized a MongoDB schema to store non-relational data such as vehicle specifications, station locations, and transaction logs.
- API Integration:** Established robust communication between the Backend and Frontend/Mobile via Axios, handling error states and loading transitions effectively.

IGCSE LEARNING SYSTEM

9/2025 - 12/2025

Role: Fullstack Developer

Technologies: ReactJS, React Native, Zustand, RESTful API, Vercel.

Frontend Development (Web):

- Developed a responsive education web using ReactJS for course and student management.
- Integrated RESTful APIs for real-time synchronization with the backend server.
- Managed complex state using Zustand to handle learning modules and user sessions.
- Deployed on Vercel to ensure high availability and seamless web access.

Mobile Development (App):

- Built a cross-platform mobile app with React Native for on-the-go exam practice.
- Implemented real-time sync to update student progress instantly across platforms.
- Optimized UI/UX and state with Zustand for high performance and smooth navigation.
- Executed APK build for mobile distribution and direct device installation.

Tools & DevOps:

- Managed version control and collaboration workflows using Git/GitHub.

EDUCATION

Bachelor of Software Engineer

8/2022 - PRESENT

School of Technology | FPT University Campus Ho Chi Minh

GPA: 3 / 4.0
